Where mobile web loses people.

130%

more orders from shoppers in an app than on mobile web.

Venn Apps, 2025

Slow first load	Every visit starts in a browser tab, so shoppers wait before they see a product.
No place on the home screen	Once the tab closes, the only way back is a search or another paid ad.
No direct line	Restocks and offers go to email, where most of them are never opened.
Checkout from scratch	Addresses and card details are typed again on a small screen.

Installs from your own site

Push that sells

Restock alerts, drops, abandoned carts and order updates, straight to the lock screen.

A portal your team runs

Change banners, collections and offers yourselves. No release, no ticket.

Built, launched and maintained by Bonsify. No developers to hire on your side.
